

# Corporate Social Responsibility Policy

Alide Hire Services, as a member of the business community, recognises its corporate social responsibility commitments in its various roles, which include insurer, investor, employer and consumer.

'As a responsible business we believe that the long-term future of the business is best served by respecting the interests of all our stakeholders: employees, customers, suppliers and the wider community. We look actively for opportunities to improve the environment and to contribute to the wellbeing of the communities in which we trade.'

This policy sets out the 4 principles we follow and the programmes we have developed to focus on the areas where we have significant impact or influence.

## Purpose

The purpose of this policy is to make clear to all stakeholders what we mean by corporate social responsibility and how we propose to work towards achieving it.

The policy includes simple summary statements drawn from fuller policies on those topics, which, in our opinion, constitute corporate social responsibility. The exception to this rule is the case of "customers", where each business unit defines its own approach to its marketplace.

## Principles

### 1. Shared responsibility

Social and environmental responsibility involves everyone. In our own case, Alide Hire Services structure means that employees share the responsibilities of ownership as well as its rewards. We aim to develop and implement social and environmental policies which fit in with our employees, stakeholders, customers and suppliers' everyday activities and responsibilities.

### 2. Honesty and accountability

Democratic ownership means the sharing of profit, knowledge and power. We will communicate our environmental policies, objectives and performance openly and honestly to our employees and customers and to others with an interest in our activities, including customers and suppliers. We will encourage them to communicate with us and seek their views.

### 3. Sustainable progress

We are committed to work to improve our performance. We will consider technical developments, changing scientific evidence, costs and customer concerns and expectations in the development and implementation of all new social and environmental policies and procedures. We will monitor our performance, set objectives for improvements and report our progress.

### 4. Demonstrable compliance

As a minimum, we will meet or exceed all relevant legislation. Where no legislation exists, we will seek to develop and implement our own appropriate standards.

The policy provides stakeholders and customers with a statement of our commitments under a family of eight corporate social responsibility policies.
